Guide to Pulling Test Result Spreadsheets by Grade in Alpine Achievement

1. On the myAlpine Home page, select the assessment for which you want results by grade. For this example I will pull i-Ready Math results. To do this, select the Measures Tab, then the Local Tab, and select i-Ready Math.

2. Select Rosters.
3. Under the **Quick Roster** section, then under **Which Data?**, select the **Grade** for which you would like results. In this case I will run the report for Grade 3. Click **Run Report**.

4. The report will output an Excel spreadsheet containing all i-Ready Math test results for Grade 3.
